

STEVEN Y.M. SIAHAAN

SOFTWARE ENGINEER | WEB DEVELOPER

+62 896-3079-6117 | stvnsiahaan@gmail.com | linkedin.com/in/steven-y-m-siahaan-97bb74262

PROFESSIONAL SUMMARY

Final-year Bachelor of Applied Science (D4) student in Software Engineering Technology with hands-on experience developing web-based inventory systems using Laravel and MySQL, supported by academic projects in machine learning and decision support systems. Skilled in requirements analysis, database design, full-stack web development, and translating operational workflows into maintainable software. Demonstrated communication and leadership experience through supporting 64 undergraduate students and serving as Vice Chairman of the Software Engineering Student Association.

TECHNICAL SKILLS

Programming Languages: PHP, JavaScript, Python, Java, C, Kotlin

Frameworks & Libraries: Laravel, Node.js, Vue.js, Angular, Flutter, .NET, Tailwind CSS, Bootstrap

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, Jira, Trello, Bitrix, Visual Studio Code, Tableau, Jupyter Notebook, Android Studio

Core Competencies: Requirements Analysis, System Design, Database Design, Web Application Development, Responsive UI, Machine Learning, Testing, Deployment Support

PROFESSIONAL EXPERIENCE

Web Developer Intern | PT Mandiri Inti Perkasa

Jakarta, Indonesia | Mar 2025 - Dec 2025

- Analyzed clinic workflows for medicines, medical equipment, and consumables, then translated operational needs into functional and system requirements.
- Designed database structures and data flows to support stock receipt, stock usage, item classification, and inventory reporting.
- Developed and maintained a web-based clinic inventory module using Laravel and MySQL with structured, maintainable code.
- Implemented stock update, item management, and reporting features, and supported system deployment, performance, scalability, and reliability improvements.

Student Teaching Assistant - English I | Institut Teknologi Del

Laguboti, Indonesia | Aug 2024 - Dec 2024

- Assisted lecturers in delivering English grammar lessons and supporting classroom activities for undergraduate students.
- Supported 64 students in understanding course materials while encouraging participation, communication, and academic progress.

EDUCATION

Bachelor of Applied Science (D4), Software Engineering Technology

Institut Teknologi Del - Laguboti, Indonesia | Aug 2022 - Oct 2026 (Expected) | GPA: 3.34/4.00

- Relevant coursework: Software Engineering, Algorithms, Artificial Intelligence, Web Development, Mobile Development, and Operating Systems.

LEADERSHIP & ACTIVITIES

Vice Chairman | Software Engineering Student Association - Institut Teknologi Del

Aug 2024 - Aug 2025

- Coordinated student programs and organizational activities while supporting collaboration and communication among members.
- Represented and advocated for Software Engineering students in academic and organizational matters.

SELECTED PROJECTS

Medicine Restock Forecasting and Decision Support System

Final Project | 2026 | Python, Flask, Pandas, Forecasting

- Developed a forecasting pipeline for monthly medicine demand using Single Exponential Smoothing, Croston, and Syntetos-Boylan Approximation for intermittent demand data.
- Classified demand patterns using ADI and CV^2 , then evaluated one-month-ahead forecasts through walk-forward validation using WAPE, MAPE, MAD, and MSE.
- Converted forecasting results into safety stock, reorder point, and recommended restock quantities in a web-based decision support system for clinic inventory planning.

Papaya Leaf Disease Identification Using CNN

Academic Project | Aug 2024 - Dec 2024 | Python, Convolutional Neural Network

- Built and evaluated a Convolutional Neural Network model to identify diseases from labeled papaya leaf images.
- Applied image preprocessing techniques to improve data quality and support model performance for early disease detection.

Digital Marketplace for Pasar Balige

Academic Project | Jan 2024 - Jun 2024 | Laravel, MySQL

- Gathered requirements from local sellers and buyers, designed the system architecture and database, and developed product listing, transaction, and user interaction features.
- Built the platform with a focus on scalability, usability, and improved digital access for traditional-market businesses.

Meinoel Keripik Pisang Business Website

Academic Project | Jan 2023 - Jun 2023 | HTML, CSS, JavaScript, PHP

- Designed and developed a responsive business website containing product information, company profile, and contact features to strengthen online visibility and customer engagement.

CERTIFICATION

Junior Web Programmer - Digital Talent Scholarship

Vocational School Graduate Academy

- Completed practical training in Bootstrap, PHP, MySQL, JavaScript, responsive web design, database management, and web application development practices.

LANGUAGES

Indonesian: Native proficiency

English: Professional working proficiency
